

Elite Series

LP Dual Sliding Doors

The Most Advanced and Durable Door in the Industry

Elite Series LP Doors are the most advanced and durable doors that Subzero has produced to date. They have the rigid design that is inherent of Elite Series Products, and the advanced features that have taken years to develop. They feature smooth operation, adjustable closing and dampening speeds, and durability. Implement the LP Door when nothing but the best will do.

The Most Advanced Features in the Industry

Aluminum Valance

A low-profile valance made of extruded aluminum covers the internal components.

Auto Closer — Premium

Subzero equips this door with two automatic closer units. These units are tested for 1 million cycles, and offer adjustable closing speeds.

Soft Closing Damper

Two soft closing rack and pinion systems ensure this door never slams. The dampening speed is also completely adjustable.

Self-Supporting

Frames on either side of the sliding doors support the entire weight of the door.

Large Panel Inserts

Sturdy aluminum frames allow us to use large clear panel inserts.
